Access Mode

Android App (with OTP verification over SMS).

App Description

EngCoach is a Bangla-medium English learning application. A short check first finds which grammar rules and vocabulary the user is weak in, the lessons then cover only those, and a second check measures the improvement. Two sections are live: Grammar (6 topics) and Vocabulary (4 adaptive levels). Every rule, word and wrong answer is explained in Bangla. Access requires an active subscription, confirmed through OTP verification.
